INTENDED USE

This accessory is intended to be used with the Airshield Powered Respirator.

BATTERY PACK CHARGING

The Powered Respirator is supplied with one rechargeable battery pack for four hours duration. For eight hours duration an additional rechargeable battery pack and battery charger is required.

Check the voltage shown on the charger is suitable for the mains supply. A thermal fuse protects the charger against short circuiting and overloading.

Push the battery pack connector into the charger socket and plug the charger into the AC supply socket, the light on the charger confirms, when lit, that the battery is charging.

Battery pack should be initially charged for 24 hours. 14 hours thereafter from fully discharged. 3.5 hours charge will enable 1 hours usage. The light will not extinguish when the full charge has been achieved.

The Charger must be disconnected from the mains supply when not in use.

After the charging period, withdraw the charger from the AC supply socket and disconnect the battery pack from the charger.
